This year's theme, "Beyond ELV: The Expanding Requirements for Compliance Reporting" will focus on what you need to know to meet upcoming and ever-changing requirements.

Hear the latest on GDPR Reporting challenges, Brazilian RoHs, Waste Frame Directive, ELV in Asian Pacific & Europe, Polymer Reporting, Prop65 impacts and of course, IMDS. What was new in 12.0 and what's coming next.

Our OEM/Supplier Panel (including GM, FCA, Ford, Honda, Toyota, Cummins, and Aptiv) will discuss data quality concerns, and we will hear an update from the IMDS Steering Committee. By attending this conference, you will be more insightful on reporting requirements and regulations that are impacting your day to day business.
