Due to the overwhelming responses from clients that have attended Tetra Tech’s IMDS Standard Training, and in partnership with DXC Technology (formerly Hewlett Packard Enterprise), we have updated our training schedule to include IMDS Basic training. This training session is specifically designed for the novice IMDS user and is a great pre-course for those enrolling in our IMDS Standard training session.

Tetra Tech will continue to use a highly successful, hands-on approach with industry specific examples and exercises to effectively demonstrate the nuances associated with the system. This class will cover the very basic steps required to complete an IMDS submission.

**Tetra Tech Office Training Sites**

- Ann Arbor, MI
- Research Triangle Park, NC
- Duluth, GA
- Cincinnati, OH
- Orlando, FL
- Oak Ridge, TN

**Highlights of Training Sessions**

- Overview of the End of Life Vehicle directive
- Introduction to the International Material Data System
- Simple and basic hands-on training exercises utilizing the IMDS training server:
  - BoM review
  - Receiving / reviewing supplier data
  - Creating an MDS
  - Adding supplier data to own MDS
  - Using published data
  - Completing a data submission to the customer

**Contact Information**

For current classroom availability or more information, please contact our training coordinator, Mayrie Eckermann, 734.213.5078 or at IMDS@tetratech.com.

Attendees will have access to the IMDS training server for 30 days and the system manual.
