

IMDS Standard Training

IMDS Standard Training

This training session is specifically designed for those that have taken the basic introduction to IMDS, whether from attending a Basic Training session or from your company's prior IMDS reporting person(s).

The Standard Training session focuses more on supplier data review, customer-specific requirements, Annex II and applying exemptions, and the presence of SoCs that are not applicable to Annex II exemptions.

Tetra Tech will continue to use a highly successful, hands-on approach with industry-specific examples and exercises to effectively demonstrate the nuances associated with the system. This class will cover where guidance documentation can be found in IMDS as well as the very basic steps required to completing an IMDS submission.

Tetra Tech Office Training Sites

- Ann Arbor, MI
- Research Triangle Park, NC
- Cincinnati, OH
- Orlando, FL
- Mississauga, Ontario

Highlights of Training Sessions

- Overview of the End-of-Life Vehicle Directive
- Introduction to the International Material Data System
- Exercises to complete a customer's IMDS submission request (beginning with receiving the request to having it rejected and then completing the resubmission):
 - BoM review
 - Receipt and review of supplier data containing prohibited substances
 - Creating an MDS and MMDS
 - Adding supplier data to own MDS
 - Using published data (IMDS committee and manufacturers)
 - Completing a data submission to the customer
 - Rejecting a data submission
