

6121 IMDS Advanced

Objective

You will expand and deepen your existing IMDS knowledge in order to make your IMDS workflows efficient and safe. You know the application-relevant basic substances in IMDS and can assign and check application codes. You are familiar with the IMDS regulations 001 and 019, particularly with regard to OEM requirements, and can use your knowledge to create accurate material data sheets. You know how to use IMDS analysis functions in practice to check your data for basic substances compliance, among other things. You are able to process incoming MDS requests and create your own. In addition, you are able to operate and administer the IMDS system safely and know the concept of the organizational units in IMDS.
