

With the so-called Chemistry Manager, IMDS Release 11.0 is making available an entirely new feature. The Chemistry Manager will support users in complying with REACH and Biocides requirements. A new communication model in the supply chain will allow for a much faster availability of REACH and Biocide information.

In this webinar, you will learn what benefits the Chemistry Manager can offer and how to work with it purposefully and efficiently.

Objective

In this webinar, we introduce you to the new information philosophy and the applications of the Chemistry Manager. You are familiar with the most important requirements of the currently valid REACH and Biocides regulation. After completing this webinar, you will know how to work efficiently with the Chemistry Manager.

Content

- Reasons for Release 11.0 and the Chemistry Manager
- Relevant legal regulations
 - REACH
 - Biocides (BPR)
- General features of Chemistry Manager
