

Goal

You know the uses and functions of IMDS-a2, which takes into account the latest IMDS Release, and are able to assess the benefits IMDS-a2 brings for your work. You are able to install IMDS-a2 and set up your personal user environment.

You know how to manually create and check material data sheets, and how to create MDS automatically, and efficiently, by using the Import function.

You are able to compare two material data sheets or modules by using the provided MDS Compare function and know how to interpret the results correctly.

You know how to use the MDS Request function and are familiar with the respective Dashboard, which provides handy support in organizing and managing MDS requests, as well as with the a2-Report Manager, which offers additional reporting functionalities.

Content

- Application and functions range
