

## 61WS IMDS Workshop

This workshop provides you an opportunity to check your current IMDS skills and hone them where necessary. While we summarize the most important IMDS topics, which will be presented briefly in the form of “reminder” units, you can work along on your own IMDS tasks, discuss them and find more efficient ways to deal with them.

### Goal

You are able to find more accurate and efficient solutions for your daily IMDS tasks. You hone your existing IMDS skills and optimize your general approach. You understand the legal requirements, OEM requirements and Tier1 requirements and are able to deal with them in an effective manner. You are familiar with the current IMDS rules and can apply them confidently in order to create correct material data sheets. Questions arising from your daily work will be analyzed and tended to.

You know the elements affecting your IMDS process. You can assess your company’s situation regarding IMDS and identify potential for optimization. You have a good grasp of the IT tools available for supporting your IMDS work.

### Seminarinhalt

- About this training
  - Objectives
  - Discussion: participants’ questions and tasks
- Relevant legal framework
