

6150 REACH for downstream users in the automotive industry

Goal

The participants know the background and aims of the REACH directive and learn which company areas are affected by it. They know, when a registration of substances is necessary and about their duties regarding uses and potential authorization and restriction of substances and preparations. The participants are capable of using the IMDS to identify REACH-relevant substances and can analyze own and incoming material data sheets in relation to REACH. The participants know about their duties to inform both up- and downstream in the supply chain. The participants know, which options they have should substances and their uses not be (pre)registered.

Content

- Background and objectives of REACH
 - Background and legal frame of REACH
 - Substances, preparations and products
 - Phase-in substances and non-phase-in substances
 - Overview schedule
 - Transitional periods for registration of preregistered phase-in substances
 - Preregistration and Registration
- Roles and responsibilities
