

CDX

MEETING REGULATIONS

The sustainable supply chain communication and analytics platform for Aerospace & Defense, Electronics, Heavy Equipment, Shipbuilding and Automotive.

For manufacturers committed to building safer, cleaner and more transparent products, CDX (Compliance Data eXchange) unifies material data management, substance tracking, conflict minerals due diligence, and regulatory reporting on one secure cloud platform. Compliance teams get a connected supplier network, validated data at the source, and continuous regulatory updates — keeping them ahead of regulations that matter, and what comes next.

Streamlining compliance in a regulated world

As global supply chains stretch further and regulations multiply, product compliance grows more complex. Customers expect transparency, while regulators demand documented disclosure.

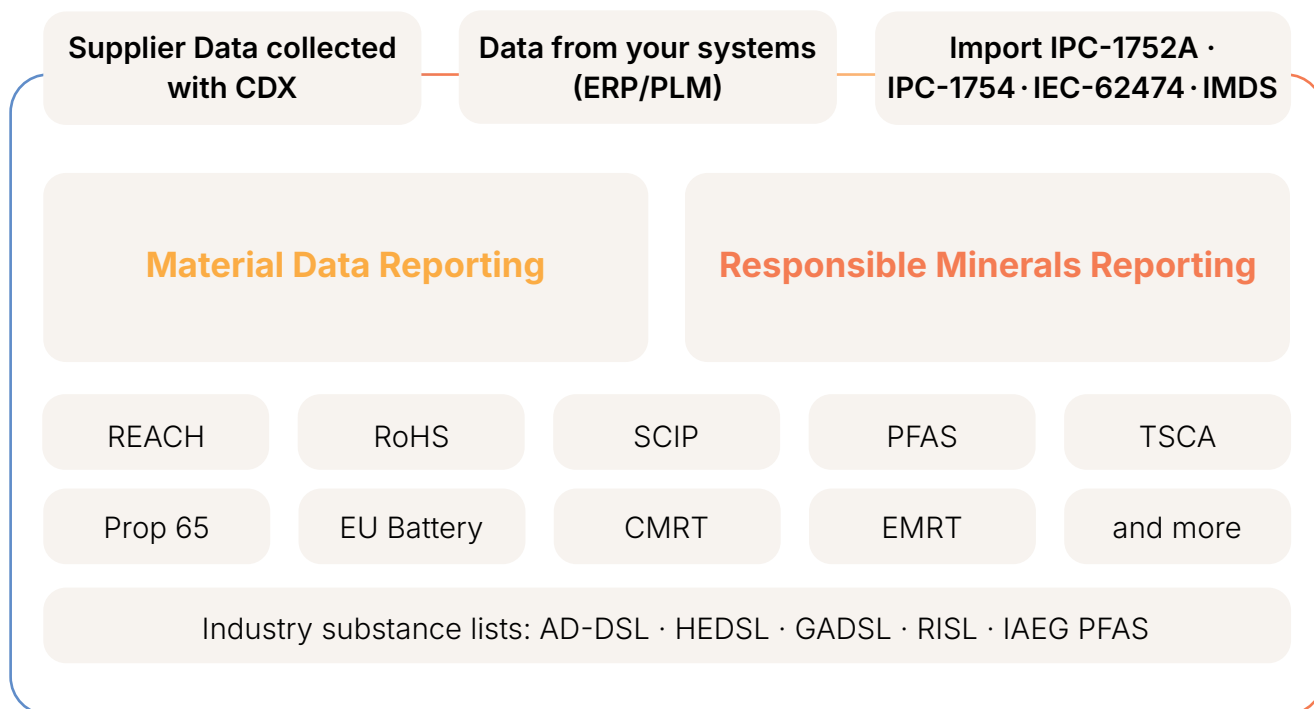

Manufacturers navigate fragmented data, spreadsheets, and email chains, reconciling substance lists that shift each legislative cycle. Without a single source of truth, critical questions go unanswered: which parts come from restricted regions, which suppliers face sanctions, which products risk losing market access? Falling behind means strategic decisions made blind.

CDX offers a single, future-ready compliance platform to meet these challenges & turn regulatory pressure into a competitive advantage.

A connected platform for the full compliance stack

- **One platform, every regulation.** Replace fragmented spreadsheets and point tools with a single cloud platform — updated as rules change.
- **Validated data at the source.** Suppliers respond directly through CDX with automated checks.
- **Built for the whole supply chain.** Multi-tier requests, multilingual workflows, and reusable declarations cut manual follow-ups across deep supply chains.
- **Compliance work that scales.** System-to-system connections to ERP, PLM, and individual systems, with direct ECHA API integration for SCIP — on a network 17,000+ companies strong.

CDX is built around two reporting engines that share a supplier network, data formats, and regulatory updates — so a single submission satisfies many obligations at once.

Why CDX?

Built around real workflows

Inbox, outbox, bulk supplier invitations, and reusable declarations — designed for compliance teams who don't have time to chase email chains.

A network already in place

17,000+ companies across 89+ countries already exchange validated data on CDX. Onboarding starts on day one.

Built for deep supply chains

Multi-tier requests, multilingual workflows, and reusable declarations cut manual follow-ups across the entire supplier network.

Enterprise-grade from day one

Oracle-powered cloud, ISO-certified security, GDPR-compliant. Production-ready infrastructure, no extended setup.
