

IMDS Plus

IMDS POWER USERS GET AN EFFECTIVE SOLUTION

Simplify IMDS data input while increasing the productivity of your IMDS users and accelerating review of incoming data sheets.

The **International Material Data System (IMDS)** is a detailed tool for material data reporting. If you need a way to save time while using IMDS including SoC and SCIP reporting, then **IMDS Plus is a powerful solution to efficiently enter IMDS data**. If you want a summary of the data status, if you work with Substances of Concern (SoC) and require information on PFAS and REACH, or if you are a user who frequently creates and handles material data sheets (MDSs) or needs to regularly check incoming data sheets - then IMDS Plus is a good choice.

Identify your compliance requirements

- Find you have **more complex components** & are taking a lot of time to enter them into the International Material Data System (IMDS)?
- Want a way to **reuse data from your other systems** without rekeying data into IMDS?
- Find it time-consuming to **review incoming data** to ensure it meets your requirements?
- Want a **low-cost, low-time and low-effort solution** to all these items?

Consider DXC IMDS Plus and the features it offers

- **Powerful analysis engine** for substance reports
- **Configurable checks** by setting rules to meet various customer requirements
- Incoming data sheets are **automatically checked based on user-selected rules**
- **Reports** that identify incomplete information and support supplier management
- **Improved search mechanisms** that include configurable, unlimited and exportable search results

Why IMDS Plus?

Analysis & Reporting

- Unlimited analysis of all MDSs of an IMDS company – no 500 maximum
- Considers thresholds & ranges for percentages and weights in analysis
- Multiple analysis can be combined – results can be input for succeeding analysis options
- Analyse for MDSs containing substances relevant for SCIP reporting
- Substance report listing the retrieved MDSs incl. the substance details analysed for and their location within the MDS

Company-specific substance lists

- Create your own company-specific substance lists
- Analyze MDSs for Basic Substances/Lists not part of IMDS, e.g. RoHS, Batteries, Packaging ...

Compare MDSs

- Compare different MDS versions or data sheets
- Flag differences between versions or data sheets

Bulk Processing

- Process bulks of MDSs without limits
- Create analysis reports listing materials, classifications and substances in an aggregated form

Examiner

- Use configurable rules to ensure consistent quality standards
- Check data sheets - your own and incoming data - with your own rules

SCIP bulk submission

- Submit an unlimited number of MDSs at once to SCIP
- Save a considerable amount of time by submitting many MDSs at once

Inbox automation

- Automatically check incoming data to your requirements
- Automatically reject MDSs not fulfilling quality rules incl. rejection reasons

Reporting

- Detailed analysis report
- Missing and invalid data sheets
- Application and parts marking
- Structure validation
