BASIC IMDS TRAINING:

The Basic IMDS course is a one-day course, it provides trainees with practical 'hands on' computer training to learn how to use the IMDS system and upload component and materials data. The course is based on a series of exercises using the DXC IMDS Training server which allows users to become familiar with the basic functionality of IMDS in a secure environment.

ADVANCED IMDS TRAINING:

The Advanced IMDS course provides trainees with an understanding of the strategic importance of IMDS in supporting your compliance management and customer reporting obligations and provides best practice guidance on how to implement IMDS within your organization efficiently.
